

## New Playground Design Request Form

---

Company Name

---

Responsible Parties Name

---

Contact Parties Name

---

Contact Parties Phone Number

---

Alternate Phone Number

---

Email Address

---

Playground Installation Address

---

City, ST ZIP Code

### **About Your Location**

1. What is the effective clear ceiling height of proposed location (see instructions below)? \_\_\_\_\_
2. Do you have a CAD file (provided by an architect) that you can provide us? \_\_\_\_\_
3. Are there any beams, poles or obstructions in your location that will be in the playground installation area?  
\_\_\_\_\_
4. Are there any obstructions in the ceiling space such as air conditioning vents, exhaust ducts, hanging lights, etc. in the space above the playground structure? If so, please provide pictures of the obstructions and measurements as well. \_\_\_\_\_  
\_\_\_\_\_
5. Are there any hidden doors or fire exits we need to be aware of in the playgrounds area? \_\_\_\_\_
6. Do you happen to know what IBC (International Building Code) is adopted by the city where the playground will be installed? If not, we can look into this information for you (ONLY APPLIES TO USA CUSTOMERS). If this is applicable to you, there are many rules that must be followed such as having the playgrounds 5' away from walls. \_\_\_\_\_

## About Your Playground

1. Do you have any specific themes or colors that you would like to see in your custom design? If you are unsure please see the following suggested themes and/or color schemes on the attached pages. The more information you can provide us with what you like, the easier and faster the design process will go.

---

---

2. Would you like us to include any of our interactive soft play or other play items that may require electricity?

---

3. Would you like us to include ball pits? \_\_\_\_\_

4. Would you like us to include a ball blaster zone or ball blaster guns? \_\_\_\_\_

5. Would you like us to include a separated toddler area? \_\_\_\_\_

6. Are there any specific items that you "MUST" have in your design? If so, please list them here: \_\_\_\_\_

---

---

7. Would you like the bottom level of the play structure to be "Open" with many entrances or "Closed" with only one or two access points? \_\_\_\_\_

8. Would you like any fencing around the playground to create only one entrance into the play area? This is typically used to control the flow of kids into the actual play area (if a separate entrance fee is required)?

---

9. Do you have an anticipated opening date in mind for your new business (if applicable)? \_\_\_\_\_

10. Do you have a budget in mind for your entire playground structure area? Please provide your budget in USD.

---

### Additional Notes

- **All customer design requests MUST be accompanied by real pictures of the location in which the playground will go. Pictures are very important to our designers so they can clearly understand the space and design a playground to fit is perfectly.**
- If you have designed your own floor play layout, please be advised that we require at least 18" of space away from any walls and 8" away from the ceiling to allow for room for installation.
- EVA soft floor mats will be included with your playground design in the playground area only (unless otherwise indicated). If you would like additional EVA soft floor mats in other areas of your location please let us know.
- Our standard height for each level of the playground is as listed below. If you would like anything different than listed below please let us know.
  - 1<sup>st</sup> Level: 5.9' (1.8m)
  - 2<sup>nd</sup> Level and Each Level Above: 4.9' (1.5m)
- If you purchase any ball blaster guns or a ball blaster zone, you will need to leave space for an air compressor which will need to be stored in a utility room or storage room.
- If you would like your logo included as part of your playground design please submit it to use in AI format.
- The more information you can provide us about what you would like in your design the less time we will need to spend making multiple revisions.

Please include any additional notes about your design ideas and or anything else that we may need to know about what you are looking for below. Please keep in mind that we get many design requests every day and we try our best to get them done as soon as possible. Please ask your consultant about our current new design wait times.

**ANY ADDITIONAL NOTES:**

Ceiling Height Calculations:

To help you to answer the question about the ceiling height in the question above please see the drawing below:

Effective Clear Height is the height from the lowest point of any unremovable object on the ceiling to the floor. Such objects may include surveillance camera, beam, light, or air vent tube. Normally, the height of your indoor playground should not exceed the Effective Height, otherwise the objects may hinder the installation of playground.

Below are two examples of Effective Clear Height:
